

# **PROSPECT HOUSE**

## **A Psychosocial Rehabilitation Program For the Severely and Persistently Mentally Ill**

Prospect House is a program designed to meet the needs of individuals who have been psychiatrically hospitalized and those with severe and persistent mental illness.

### **Our Goals**

- To provide support and to foster the development of skills which enable successful community living.
- To reduce the need for hospitalization and re-hospitalization.

### **Our Services**

- Psychosocial rehabilitation is the treatment modality of Prospect House.
- Prospect House members participate in a therapeutic community. The program is designed to facilitate growth by helping members to join together to perform necessary skills required in the community.
- Each member has a role and purpose in
- Contributing to Prospect House.

### **Prospect House offers:**

- Pre-Vocational training and opportunities
- Case management services for obtaining/maintaining housing and finances
- Educational support services
- Social skills development
- Individual and group counseling
- Medication services
- Family consultation
- Services for the elderly population
- Substance support and referral

### **HISTORY OF PROSPECT HOUSE**

Prospect House was developed in the early 60's to meet the needs of many individuals discharged from state and county psychiatric hospitals. The program has grown to become one of the largest psychiatric rehabilitation programs in New Jersey.

Prospect House, a program of the Mental Health Association of Essex County, is located at 424 Main Street, East Orange, NJ. The Mental Health Association has facilities in several suburban locations serving clients with family and individual problems. The Executive Director is Robert Davison.
